AI resource list for educators

By Jeremy Caplan jeremy@jeremycaplan.com wondertools.substack.com

This reading list will help you explore how to make the most of AI.

1. Creative ideas to use AI in education

A crowdsourced collection edited by Chrissi Nerantzi, Sandra Abegglen, Marianna Karatsiori and Antonio Martinez-Arboleda

2. How to use AI to do practical stuff: A new guide

Wharton Professor [Ethan Mollick](#) has a great newsletter, [One Useful Thing](#). In this post, he explains practical ways to benefit from AI.

3. Post-AI assessment design

[Dr. Phillipa Hardman](#), an affiliated scholar at Cambridge University, explores creative ways to reconsider assessments in this new era.

4. 30 AI tools for the classroom

This collection of sites, apps and teaching resources provides a nice overview of some of the practical ways educators can use AI.

5. How to use ChatGPT as an example machine

This helpful piece, published by the excellent [Cult of Pedagogy](#), shows how teachers can use AI to generate all sorts of examples.

6. For Education, ChatGPT Holds Promise — and Creates Problems

This excellent collection of pieces explores how AI is impacting higher education from a variety of perspectives.
